10 YEARS OF THE MISSION

Startup India a revolution, says PM

“WE NOW NEED TO PREPARE OURSELVES FOR THE FUTURE AND WORK ON NEW IDEAS. THERE ARE SEVERAL DOMAINS EMERGING, SUCH AS AI, THAT WILL PLAY AN IMPORTANT ROLE IN STRATEGIC SECURITY AND AUTONOMY. A NATION’S COMPETITIVE ADVANTAGE IN THE FUTURE WILL DEPEND ON HOW FAR IT ADVANCES IN AI INNOVATION, AND IN INDIA, STARTUPS MUST LEAD THIS EFFORT”

Narendra Modi
Prime Minister (at an event to mark National Startup Day in New Delhi)

UDISHA SRIVASTAV
New Delhi, 16 January

The country’s startup ecosystem transitions into a mature phase as the Startup India Mission marks ten years of its launch, a journey increasingly defined by successful initial public offerings (IPOs) and a shift towards sustainable, long-term business models.

Speaking at Bharat Mandapam, Prime Minister Narendra Modi on Friday described the Startup India Mission as a revolution that transformed the country’s entrepreneurial landscape over the past decade.

“In just 10 years, the Startup India Mission has turned into a revolution. India is currently the third largest startup ecosystem in the world. Ten years ago, the country had less than 500 startups but now, the count has grown to more than 200,000 startups. In 2014, there were just four unicorns but now there are over 125 active unicorns.”

PM urged startups to focus on artificial intelligence (AI)-led innovations.

The country’s IPO market scaled to a record high in calendar year 2025.

According to a report from Kotak Investment Banking, IPO volumes grew 13 per cent year-on-year in 2025, standing at ₹1,89,020 crore. Another report said that one of the highlights of the year was the rise of startup listings with as many as 18 startups, including Lenskart, Groww, Meesho, and PhysicsWallah, going public and collectively raising over ₹41,000 crore. In 2024, startups raised ₹29,000 crore from the primary market.

“We now need to prepare ourselves for the future and work on new ideas. There are several domains emerging, such as AI, that will play an important

Gujarat, Arunachal, Goa have strongest ecosystems for budding firms: DPIIT

Gujarat, Arunachal Pradesh and Goa ranked as the “best performers” in developing a startup ecosystem for budding entrepreneurs, according to the ranking of states and Union Territories by the DPIIT.

Gujarat has been ranked as the best performer for a fifth time in a row. Karnataka, Punjab, Tamil Nadu, Uttar Pradesh, and Himachal Pradesh are categorised as the top performers.

“By encouraging both healthy competition and collaboration among state governments, the framework supports the development of strong, well-functioning startup ecosystems across the country,” the department said.

role in strategic security and autonomy. A nation’s competitive advantage in the future will depend on how far it advances in AI innovation, and in India, startups must lead this effort,” PM said.

Referring to the government’s efforts, Modi highlighted measures such as easing compliance cycles, setting up of incubation centres, opening the space sector for private players, establishing a Deep-tech Fund of Funds, and a Research, Development and Innovation Fund worth ₹1 trillion.

The PM also noted that 48 per cent of startups are women-led (with at least

one-woman director) and more than ₹25,000 crore has been disbursed to date under the first edition of the Fund of Funds scheme for startups. In 2025, over 44,000 startups were given recognition by the Department for Promotion of Industry and Internal Trade (DPIIT).

Ashwini Vaishnaw, Union minister of the Ministry of Electronics and Information Technology, said that currently 80 per cent of home-grown startups are AI-led and the design linked incentive (DLI) scheme has extended support to 23 startups so far.

“Bharat’s deep-tech startup ecosystem is expanding, driven by focused policy and funding support. Today, 80 per cent of our startups are AI-led. DLI scheme under India Semiconductor Mission has supported 23 startups so far. For institutional funding, the \$1 billion India Deep Tech Alliance (IDTA) was announced at Semicon India 2025,” Vaishnaw said in a social media post.

Even as the PM congratulated the stakeholders, several venture capitalists also lauded the startup ecosystem and its evolution in the past decade.

Archana Jahagirdar, the founder and managing partner of Rukam Capital, said that the emphasis has shifted decisively to sustainable and long-term business models, and the IPO market is witnessing growth.

“Since 2021-22, India’s IPO market shifted to a structurally sounder trajectory, with tech-led firms as initial sector leaders, spreading across various sectors thereafter. This has been maintained well into 2024 and 2025, with record capital raised, larger-sized issues, with widespread participation in both mainboard and SME listings, underpinned by deep domestic liquidity.”

Consumption, not tech, powers India’s startup boom

As India marks a decade of the Startup India initiative on the National Startup Day (January 16), the composition of its ecosystem highlights limited depth on the technology and enterprise front. According to the Department for Promotion of Industry and Internal Trade (DPIIT), only 1.5 per cent of recognised startups are in the space of AI, pointing to relatively shallow penetration into these frontier enterprise-grade technologies.

SHIKHA CHATURVEDI

IT, health care services dominate startup ecosystem

The largest share of recognised startups is in information-technology services, health care, education, and agriculture

Top 5 industries

- IT services: 14,569
- Health care & life sciences: 11,546
- Agriculture: 6,744
- Education: 7,513
- Food and Beverage: 6,426
